Guarantee

The sale offering is guaranteed to be fertile and reproductively sound in accordance with the terms and conditions as recommended by the Red Angus Association of America. If a guarantee situation occures, the buyer will have the option to select a suitable replacement, if available, or take a sale credit. All bulls are guaranteed through the first breeding season which is considered to end September 1 of the year of purchase and any claims need to be made by that date.

Sale Order

Sale order will be posted 2 weeks before sale day

Liability

All persons who attend the sale or view the cattle do so at their own risk. McCann Red Angus, McCann Ranch and Livestock Co., and Lewiston Roundup Association assume no liability - legal or otherwise - for any accidents that occur on sale or viewing premises.

Semen Intrests and Possession

McCann Red Angus is retaining 1/3 revenue sharing semen intrest in every bull selling in this sale. This gives McCann Red Angus the option to collect, use and market semen from any bull at the expence of McCann Red Angus and convenience of the buyer. Full possession and full salvage value sells on all bulls unless otherwise identified prior to the sale. Retained possession bulls are available for semon collection only and are required to be returned by the purchaser for Mccann Red Angus's natural breeding season. There is no guarantee on bulls to freeze semen unless specific terms are agreed to prior to sale. McCann Red Angus reserves the contrl of sale and distribution of a of all semen sold on co-owned bulls. Buyer's will be compensated upon receipt of payment for semen sold.

Herd Health

Herd health is monitored by Ferdinand Veterinary Clinic in Ferdinand, ID. All cattle will be accompanied by proper health certificates for shipment and have had a complete vaccination program. Bulls will have passed a breeding soundness exam and fertility test prior to the sale.

McCann Red Angus policy requires that all sales must be settled at the end of the sale or within 5 days if prior arrangements have been made.

Welcome to Lewiston, Idaho, and the 5th Annual McCann Red Angus Bull Sale. Lori and I are particularly excited to welcome you to our hometown, where we plan to continue offering you a wide-range of bulls to meet your needs. In addition to our yearling bulls, we also added some age-advantage bulls. The sale will take place at the Lewiston Roundup Grounds, just South of Lewiston. Both DVAAuction and LiveAuction.tv will be broadcasting live in case you are unable to be with us in person, and the cattle will be on premises for you to review.

This year Jason fed the cattle here at home on our ranch down by the Clearwater River. He is feeding a good mixture of hay, corn and supplements and the bulls look great. Jason does an excellent job with the cattle, and we couldn't be prouder! He has selected some great sires that produced some amazing calves this year. You will see calves out of Propulsion, Bieber Money Maker, Leading Edge and Freightliner to name a few. Whether you need a heifer bull or a herd sire, we have something for you. The first thing we look for in raising our cattle is disposition. If we see any displeasing traits or personalities, we do not keep them. Please give Jason a call at 208-790-0646, and let him know what you are looking for and he can find you a bull to meet your needs.

We would like to welcome the newest member of our team; Barrett Isbell, a young rancher from Herford, Texas, who joined us in December. He and his girlfriend, Clair, moved to Idaho, so Clair could finish her doctorate degree in Ag sciences from the University of Idaho. We are pleased to have them both and look forward to you meeting them at the sale. Our granddaughter, Gracie Beck, joined us full-time to take over duties of data entry, in addition, she took all the photographs, and prepared the catalog. We are so happy to have her join us and to see her on a daily basis!

Our youngest grandchild is Oliver, who is approaching 3 and our oldest, Orion, is approaching 33. We've had a great time again this year with our 11 grandchildren and our four children. It's amazing how quickly they grow up as two of our grandchildren, Lyric and Cadence will be graduating this June. Halle and Kylee are great basketball players with the Highland Huskies and had an exceptional year. Lori is in her 3rd term in the Idaho Legislature and has been selected as an honorary member of the House for FFA. Lori is serving on the Agricultural Affairs, Commerce and Human Resources and Health & Welfare Committees. It is not an election year, so we look forward to having her home this year come late spring.

Please join us the evening of the 26th for a prime rib dinner and, of course, lunch on the day of the sale. Once again, Lori and I would like to welcome you to our 5th Annual Sale, and we look forward to seeing you.

Sincerely,

Bill, Jr.

Gracie, Jason, Kylee and Halle Beck

Lori and Bill McCann Jr.

In Loving Memory of Sadie Beck

On October 11, 2002, Sadie married her 1st grade sweetheart, and together they have three beautiful daughters, Gracie, Kylee and Halle. These three were her everything. She was a wonderful mother, a true momma bear! She was so proud of her girls, and enjoyed watching their activities from school band, school plays, volleyball and basketball, but especially enjoyed helping them participate in 4H where all three girls started showing steers at a very young age.

She was also incredibly proud of Jason and how much he has helped McCann Red Angus develop. From creating that first relationship with Jesse and Charity Crump to now having our own registered herd and annual sale.

One of Sadie's favorite parts of being a part of the registered Red Angus world was creating long lasting friendships with buyers. She enjoyed going with Jason to deliver and being able to catch up with new and old friends along the way.

Get your room booked now!

Thursday, February 27th

Lewiston Roundup Grounds in the Ketch Pen

*Lunch starts at 11am

* Sale starts at 1pm

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

4135 sells as 50% we are still waiting for parentage on the Dam.

HOW THE RED COLOR WORKS

Black red carrier Angus cows produce red calves.

- B = dominant black gene
- b = recessive red gene
- bb = homozygous red
- BB = homozygous black
- Bb = heterozygous black, red carrier

	bb Red		BB Black
	Bb Black Red Carrier		

	b	b	
b	 bb	 bb	Red x Red 100% progeny will be red (even if any red parent had a black parent)
b	 bb	 bb	

	b	b	
B	 Bb	 Bb	Black Red Carrier x Red 50% progeny will be red and 50% will be black. Reds will be pure red and blacks will all be red carriers.
b	 bb	 bb	

	b	b	
B	 Bb	 Bb	Black (non red carrier) x Red 100% progeny will be black (red carriers).
B	 Bb	 Bb	

	B	b	
B	 BB	 Bb	Black Red Carrier x Black Red Carrier 75% progeny will be black and 25% will be red. Of the blacks, two-thirds (or 50% of total progeny) will be red carriers, and one-third (or 25% of total progeny) will be non red carriers.
b	 Bb	 bb
